

VtalkVoIP reduces the cost of communicating

Around the corner, around the world, any call on the Vtalk Voip network is FREE

The interoffice twin pack provides you with 2 VtalkVoip TA200s, allowing you to **make VoIP box to box calls for FREE.**

Apart from your existing Broadband Internet connection, you will pay absolutely **NOTHING** when you make calls or send faxes from one TA200 to another.

How?

VtalkVoip is the Voice Over Internet Protocol technology that unleashes the power of your Broadband Internet connection to seriously cut your phone costs. All you need to do is plug each of the TA200s into Broadband Internet connections at different locations, anywhere in the world, and you are ready to talk box to box for **FREE.** Even better, the TA200 has 2 ports - this means that you can have a dual number setup, a dual fax setup, or a combination of both! This means **free calls and faxes box to box.**

Why?

Do you have interstate, international, or geographically separated offices? Customers? Relatives? People that you call frequently throughout the week? If so, it is highly likely that you are paying more than US\$5.00 per month to maintain these relationships. The VtalkVoip Interoffice twin pack lets you select your most frequently dialed person and set them up with a TA200 so that your calls become **FREE!**

Adding More Users?

If you have more than one branch, customer or relative that you dial frequently, why not add them to the VoIP network?

VtalkVoip allows you to call not just one, but ANY TA200 for FREE!

What About Calling Non VtalkVoip Numbers?

You will **STILL SAVE!** If you call a standard landline or mobile number, you will pay a low call cost regardless of the geographic destination. All the rates are available from our web site - www.vtalkvoip.com.my
