CHIEF EXECUTIVE OFFICER'S STATEMENT

INTRODUCTION

On behalf of the Board of Directors, it gives me great pleasure to present the Annual Report of Mobif Berhad for the year ended 31st December 2005, prepared in accordance with the applicable approved accounting standards in Malaysia and the provisions of the Companies Act, 1965.

FINANCIAL AND OPERATIONAL REVIEW

For the financial year under review, the Group achieved revenue of RM36.3 million and net profit of RM9.8 million, an increase of 93.8% and 136.3% respectively as compared to the preceding financial year. The remarkable leap in the turnover was primarily driven by the increased sales of Mobif internet surveillance solutions, especially *Mobif Home* (packaged with additional hardware) and our newly introduced Voice-Over-Internet Protocol ("VoIP") products which were introduced late last financial year. The strong performance was also attributable to the continued intensive marketing efforts undertaken by the Group and the successful penetration of the Group's products into overseas market.

The net profit margin also saw a hike from 22% recorded in 2004 to 27% in 2005 mainly due to lower proportionate increase in the operating expenses as compared to the increase in revenue. This is in line with the Group's intention to keep its operating costs low.

CORPORATE DEVELOPMENTS

On 19th September 2005, the Company announced that it was proposing to undertake the following exercises:

- i) Private placement involving the issuance of up to 18,563,314 new ordinary shares of RM0.10 each in Mobif Berhad ("Placement Shares"), representing not more than 10% of the issued and paid-up share capital of Mobif Berhad ("Private Placement"); and
- ii) An employees share option scheme of up to 10% of the issued and paid-up share capital of the Company ("ESOS").

The application for the Private Placement was approved by the Securities Commission on 10th November 2005. On 3rd February 2006, the Company announced that the issue price for the Private Placement has been fixed at RM0.91 per Placement Share. Pursuant to the above said Private Placement, 6,000,000 and 6,563,314 new ordinary shares of RM0.10 each were allotted and issued on 7th March 2006 and 13th March 2006 respectively.

The five-year ESOS, approved by the shareholders at the Extraordinary General Meeting held on 25th October 2005, was implemented on 28th October 2005 and will expire by 27th October 2010.

On 14th February 2006, the Company entered into an agreement with Ying Te Yi Technologies (Beijing) Co. Ltd. ("YTYT") to appoint YTYT as Mobif's principal consultant to deploy, implement and commission VoIP networks in China and to sell and distribute Mobif's VoIP products in China.

On 27th February 2006, the Company via its wholly-owned subsidiary, Mobif Global Sdn. Bhd. entered into an agreement with Tele VoIP Italia SrL ("TVIS"), a company incorporated in Italy, to provide telecommunication services particularly a hosted soft switch to TVIS. The signing of the agreement marks the Group's first foray into the European market.

On 26th March 2006, the Company via its wholly-owned subsidiary, Mobif Global Sdn. Bhd. entered into a Memorandum of Understanding with SM Enterprise (Nanjing) Pte. Ltd. ("SME"), a company incorporated in The People's Republic of China to collaborate in joint marketing, provision of discount telephone calls service based infrastructure, equipment and services within the Province of Jiangsu, China.

On 30th March 2006, the Company entered into a Memorandum of Understanding with Sarawak Information Systems Sdn. Bhd. ("SAINS"), to collaborate in technology, research and development, provision of VoIP based infrastructure and equipment, sales deployment and service provision of VoIP telephony in Sarawak, Sabah and Brunei Darussalam. Mobif will also provide turnkey implementation of cost effective telephony solutions, project management and regional systems support and maintenance services to SAINS's clientele in Sarawak, Sabah and Brunei Darussalam.

CHIEF EXECUTIVE OFFICER'S STATEMENT

On 6th April 2006, Mobif entered into a Memorandum of Understanding with Kyocera Corporation, Japan ("Kyocera"), a company incorporated in Japan, to collaborate in technology, research and development and to appoint Mobif or its subsidiary as the exclusive distributor for the sale and deployment of Kyocera's iBurst Solution and equipment and its subsequent wireless broadband access management in Malaysia.

RESEARCH AND DEVELOPMENT ("R&D")

The Group has constantly focus on the development of new products and services especially in internet surveillance solutions and VoIP products such as soft switch turn key solution, gateway design, network, voice, video and data application, web-based interface design, e-commerce and innovative system integration. To date, the Group has developed and launched VoIP softphones, video softphones and conducted research work on call back, short-messaging-services to call and voicemail for its VoIP products. Besides constantly improving and enhancing the core Internet-based surveillance systems, the Group's R&D efforts would also be focused on the development of applications which could see Mobif systems being used not only through personal computers but also through "3-G" mobile phones, personal digital assistant and other hand-held devices. Preliminary tests are currently being carried out on the "3-G" mobile phones. The Group spent RM8.5 million for its development expenditure during the financial year.

PROSPECTS

The Group has been successful in marketing its products in both the domestic and overseas markets. It has established a global VoIP telephony network with major players in The Philippines, China, Indonesia, USA, Italy, El-Salvador and Latin America and is poised to capitalised this network to channel its sales. Continuous efforts will be made further in expanding its marketing and distribution network as well as to undertake R&D activities to develop new software and additional features for its existing products. With investment in market development and R&D activities, the Company expects 2006 to be a satisfactory year.

UTILISATION OF PROCEEDS

As at 31st December 2005, Mobif had fully utilised the proceeds raised from its initial public offering of RM10.24 million.

c) Property, Plant and Equipment

Property, plant and equipment are stated at cost less accumulated depreciation and impairment losses.

Gain or loss arising from the disposal of an asset is determined as the difference between the estimated net disposal proceed and the carrying amount of the asset, and is recognised in the income statements.

Depreciation is calculated to write off the cost of the property, plant and equipment on a straight-line basis over the expected useful lives of the property, plant and equipment concerned. The annual depreciation rates used are as follows:-

	%
Furniture and fittings	10
Office equipment	20
Computer	20
Renovation	20
Motor vehicles	20
Plant and machinery	20

d) Investments

Investments in subsidiary, which are eliminated on consolidation, are stated in the Company's financial statements at cost. Where there is an indication of impairment in the value of the assets, the carrying amount is assessed and written down immediately to its recoverable amount. The policy for the recognition and measurement of impairment losses is in accordance with Note 4(e).

e) Impairment of Assets

At each balance sheet date, the Group reviews the carrying amounts of its assets to determine whether there is any indication of impairment. If any such indication exists, impairment is measured by comparing the carrying values of the assets with their recoverable amounts. Recoverable amount is the higher of net selling price and value in use, which is measured by reference to discounted future cash flows.

An impairment loss is recognised as an expense in the income statements immediately, unless the asset is carried at a revalued amount. Any impairment loss of a revalued asset is treated as a revaluation decrease to the extent of any unutilised previously recognised revaluation surplus for the same asset.

f) Research and Development Costs

Research costs are recognised as an expense in the year in which they are incurred.

Expenditure on development is charged to the income statements in the year in which it is incurred except where a clearly-defined project is undertaken and it is reasonably anticipated that development costs will be recovered through future commercial activity. Such development costs are recognised as an intangible asset and amortised on a straight-line basis over the life of the project from the date of commencement of commercial operations, which is on average five years.

g) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined on the first-in, first-out method. Net realisable value represents the estimated selling price in the ordinary course of business less selling and distribution costs.

NOTES TO THE FINANCIAL STATEMENTS

h) Receivables

Trade and other receivables are stated at nominal values as reduced by the appropriate allowance for estimated irrecoverable amounts. Allowance for doubtful debts is made based on estimates of possible losses which may arise from non-collection of certain receivable accounts.

i) Hire Purchase Arrangements

Assets held under hire purchase are treated as if they had been purchased at cost at the commencement of the hire purchase agreements. These costs are included under property, plant and equipment and depreciation is provided accordingly. The corresponding obligations under hire purchase are included under liabilities. The finance charges of instalments payable are charged to the income statements over the period of the hire purchase agreement.

j) Provisions

Provisions are recognised when the Group has a present legal and constructive obligation as a result of past events, when it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and when a reliable estimate can be made of the amount of the obligation.

k) Transaction in Foreign Currencies

Transaction in foreign currencies are recorded in Ringgit Malaysia at the rates of exchange which approximate rates ruling at the dates of the transactions. Assets and liabilities in foreign currencies at the balance sheet date are reported in Ringgit Malaysia at rates ruling at that date. Exchange differences are dealt with through the income statements.

The principal closing rates used in the translation of foreign currency amounts are as follows:-

Currency	2005 RM	2004 RM
1 US Dollar	3.80	3.80
1 Singapore Dollar	N/A	2.35
1 Thai Bath	N/A	0.10
1 Australian Dollar	N/A	2.80

l) Revenue Recognition

Revenue is recognised when it is probable that the economic benefits associated with the transaction will flow to the enterprise and the amount of the revenue can be measured reliably.

Revenue from goods sold and services are recognised when the goods are delivered and services are rendered. Revenue represents the invoiced value of goods sold and services rendered net of discounts and returns.

NOTES TO THE FINANCIAL STATEMENTS

m) Income Tax

Income tax on the profit or loss for the year comprises current and deferred tax. Current tax is the expected amount of income taxes payable in respect of the taxable profit for the year and is measured using the tax rates that have been enacted at the balance sheet date.

Deferred tax is provided for, using the liability method, on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts in the financial statements. In principle, deferred tax liabilities are recognised for all taxable temporary differences and deferred tax assets are recognised for all deductible temporary differences, unused tax losses and unused tax credits to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, unused tax losses and unused tax credits can be utilised.

Deferred tax is measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted at the balance sheet date. Deferred tax is recognised in the income statements, except when it arises from a transaction which is recognised directly in equity, in which case the deferred tax is also charged or credited directly in equity.

n) Cash Flow Statements

The Group and the Company adopt the indirect method in the preparation of the cash flow statements.

Cash equivalents are short-term, highly liquid investments with maturities of three months or less from the date of acquisition and are readily convertible to cash with insignificant risks of changes in value.
